[Click here to view website and details](#)

**Please forward this email to anyone you know who needs to
meet the April 22, 2010 deadline.**

EPA RENOVATION WORKER TRAINING:

**This 1-day course is required for all companies performing
renovations in pre-1978 housing and/or child-care facilities and
schools where lead-based paint is disturbed.**

**This course will meet the EPA training requirements for persons
performing renovations in pre-1978 housing and child-care**

facilities. Students that complete the course will become Certified Renovators and know how to perform all work using lead-safe work practices. Students will also learn how to perform acceptance testing for their work.

Refresher training and recertification is required every 5 years.

You must become Certified by the EPA by April 22, 2010.

AMA has been providing Environmental, Health and Safety training services for over 25 years.

Please feel free to contact us if you have any questions regarding the requirements for this course or any other course offering.
